

Contents

<i>Acknowledgments</i>	ix
<i>Preface</i>	xi
1 Introduction	1
How to Use This Book	2
To Separate or Connect?	2
The Parts List	4
A Day in the Life of Movement	6
<i>In the Lab—Mobility in the 21st Century</i>	10
2 The Essentials of Movement	13
The Essentials of Movement	14
Kinesiology	14
Statics and Dynamics	14
Kinetics and Kinematics	15
Mobility, Stability, Balance, and Coordination	15
Simultaneous and Sequential Movement	16
Movement Patterns and Kinetic Chains	17
Proportion, Symmetry, and Compensation	18
Review Questions	19
3 Connective Tissue, Part 1	21
The Ubiquitous Material	22
The Basics of Connective Tissue	22
The Recipe for Connective Tissue	22
Cells	23
Extracellular Matrix	23
<i>In the Lab—A Detour Down the Meat Aisle</i>	25
Soft Tissue Properties	26
Stretch	26
Elasticity	26
Plasticity	26
Creep	26
Thixotropy	27
Tensile Strength	27
Piezoelectric Effect	28
Colloidal	28
Types of Connective Tissue	29
Considering Them <i>Structurally</i>	29
Considering Them <i>Functionally</i>	30
The Push and Pull of Your Tissues	31
A Connective Tissue Breakdown	32
Review Questions	33
4 Connective Tissue, Part 2	35
Bone	36
Types of Bone	36
Functions of Bone	36
Let's Build a Bone	37
Structure of Bone	37
Recipe for Building a Bone	37
Major Parts of a Bone	38
<i>In the Lab—Wolff's Law</i>	38
<i>In the Lab—Stacked and Compressed?</i>	39
Cartilage	40
Fascial Tissues	41
Proper Fascia	42
Fascia Profunda	42
Muscle Envelope	43
Septum	43
Aponeurosis	43
Interosseous Membrane	43
Retinaculum	43
Joint Capsule	43
Ligament and Tendon	44
Other Variations of Fascia	45
Putting It All Together	46
Bones, Fasciae, and All the Rest	46
Functions of Your Connective Tissue Network	46
A Sunflower, Fluid, and You	47
<i>In the Lab—Local, Global, Internal, and External</i>	49
<i>In the Lab—Collagen, Demand, and Flushing</i>	50
Review Questions	51
5 Joints, Part 1	53
Planes and Axes	54
Anatomical Position	54
Planes	54
Axes	56
Movements of the Body	57
Neck	57
Spine and Thorax	57
Ribs/Thorax	58
Scapula	58
Shoulder	59
Elbow and Forearm	60
Wrist	60
Thumb	60

Fingers	61
Mandible	61
Pelvis	61
Hip	62
Knee	62
Ankle, Foot, and Toes	62
Joints in General	63
Joint Classification	63
Joint Structure	63
Fibrous Joints	64
Cartilaginous Joints	65
Synovial Joints	65
Let's Build a Synovial Joint	66
Types of Synovial Joints	69
Hinge	69
Pivot	69
Ellipsoid	69
Saddle	70
Ball-and-Socket	70
Gliding	70
Joint Function	71
Joint Mobility and Stability	72
Joint Chart	73
Review Questions	74

6 Joints, Part 2 75

Range of Motion	76
Active and Passive Range of Motion	77
Hypermobility and Hypomobility	79
End-Feel	80
Types of Joint Motion	82
Closed and Open Kinetic Chains	85
Convex-Concave Rule	86
Joint Surface Positions	87
Forces Used for Mobilizing Joints	88
Bending and Torsional Forces	89
Review Questions	90

7 Muscles, Part 1 91

Basics of Muscle Tissue	92
Types of Muscle Tissue	92
Muscle and Fascia—The True Story	93
Function 101—Contractions	94
Components of Skeletal Muscle	96
The Macro View	96
Let's Build a Muscle	98
Build a Sarcomere	98
Thick and Thin Filaments	99
Sliding Filament Mechanism	99

Contraction Cycle	100
Myofibrils and Muscle Fibers	101
Plumbers and Electricians	102
The Wrap-Up	102
Functions of Muscle Tissue	103
Properties of Muscle Tissue	104
Review Questions	105

8 Muscles, Part 2 107

Shapes and Arrangements of Muscles	108
Structure	108
Examples of Parallel Muscle Designs	108
Examples of Pennate Muscle Designs	108
Parallel Bellies	109
Pennate Bellies	109
A Functional Comparison	110
Two Contests	111
Programming Our Muscle	112
Motor Units	112
All-or-None	112
Spread Out	113
How Much and How Fast?	113
Recruitment	113
Wave Summation	114
Types of Contractile Fibers	115
Three Types	115
Ratios?	116
Types of Contractions	117
Concentric	117
Eccentric	117
Isometric	118
Reverse Actions	119
The Sit-Up	120
In the Appendages	120
<i>In the Lab—Tight, Short, and Long Muscles</i>	121
Imbalances Between Muscle and Fascia	121
Tight	121
Short	122
Long	122
Review Questions	123

9 Muscles, Part 3 125

Roles of Muscles	126
No Muscle Is an Island	128
Factors That Affect a Muscle's Role	130
<i>In the Lab—Passive and Active Insufficiency</i>	132
<i>In the Lab—The Psoas-less Sit-Up</i>	133
<i>In the Lab—Bonus Actions of Muscles</i>	133
Postural and Phasic Muscles	134

Postural.....	134	I Can't Shorten If You Don't Lengthen	164
Phasic	135	Reciprocal Inhibition and Other Reflexes	164
X Marks the Spot.....	135	A Rubber Band Around a Stick	164
Length and Speed Matter	137	<i>In the Lab—Tonus</i>	165
Force and Length	137	<i>In the Lab—Equilibrium Above All Else</i>	165
Force and Velocity	138	<i>In the Lab—Reflexes</i>	165
Review Questions	139	Putting It Into Practice	166
 		The Neuromuscular System in Action.....	166
10 Nerves, Part 1	141	Proprioceptive (In)Accuracy	166
Nerves and Muscles—The Dynamic Duo	142	Levator Scapula Goes from 5 to 8.5.....	167
Central Nervous System.....	143	Using Muscle Tissue's Properties.....	167
Peripheral Nervous System.....	144	Stretch Reflex Versus Styles of Stretching.....	168
Let's Build a Neuron	145	Using the Stretch Reflex to Your Advantage	169
Parts of a Neuron	145	Relax with Your Golgi Tendon Organs.....	169
Functions	145	Post-Isometric Relaxation and Reciprocal Inhibition. .	170
Classifications.....	145	<i>In the Lab—The Infant and Lifelong Patterns</i>	171
Synapse	146	<i>In the Lab—Fun in a Doorway</i>	171
Neurons to Nerves	146	Review Questions	172
The Wrapping.....	146	 	
Peripheral Nerves	147	12 Biomechanics, Part 1	173
Cranial Nerves	147	Biomechanics—The Basics	174
Plexi and Nerve Distribution in the Appendages	149	Statics and Dynamics	174
Cervical Plexus.....	149	Osteokinematics and Arthrokinematics.....	174
Brachial Plexus.....	149	Kinetics and Kinematics.....	174
Axillary Nerve.....	150	Force	175
Musculocutaneous Nerve (C5–7)	150	Inertia and Mass	175
Radial Nerve (C5–T1)	150	Torque.....	175
Median Nerve (C6–T1).....	151	Vector	176
Ulnar Nerve (C8, T1).....	151	Friction	176
Lumbar Plexus.....	152	Velocity and Momentum.....	176
Sacral Plexus.....	152	Gravity	177
Femoral Nerve (L2–4)	152	With, Against, or Across Gravity	177
Obturator Nerve (L2–4)	153	Laws of Motion	178
Sciatic Nerve (L4–S3).....	153	First—Law of Inertia	178
Tibial Nerve (L4–S3).....	154	Second—Law of Acceleration	179
Common Fibular Nerve (L4–S2)	154	Third—Law of Action-Reaction.....	180
Review Questions	155	Force in Depth	182
 		A Review of Force and Vectors.....	182
11 Nerves, Part 2	157	Linear Force.....	183
Let's Flip the Switch	158	Parallel Force.....	183
Proprioception and Muscle Function	158	Concurrent and Resultant Forces	184
Sensors and Feedback	159	Torque in Depth	185
Muscle Spindle Cells	159	Review Questions	188
Vulnerable.....	159	 	
The Stretch Reflex.....	160	13 Biomechanics, Part 2	189
Golgi Tendon Organs.....	161	Levers	190
Lifting a Heavy Box	162	First-Class Lever.....	191
The Bowling Ball	162	Second-Class Lever	192
Pacian Corpuscles and Ruffini's End Organs.....	163	Third-Class Lever.....	193

<i>In the Lab—Two-in-One Leverage</i>	195
<i>In the Lab—In the Palm of Your Hand</i>	195
Stability	196
Equilibrium	198
Factors of Equilibrium	199
Stability Principles	200
Review Questions	202

14 Posture 203

Posture and Gait	204
Two Big Challenges	204
Posture	204
Gait.....	205
Standing Posture	206
How Do We Get You Upright?	206
<i>In the Lab—Other Postural Points-of-View</i>	208
<i>In the Lab—Healthy Posture</i>	208
The Role of Soft Tissues in Upright Posture	209
Building a Myofascial Core	210
Building Postural Supporters	212
Stability Dysfunction and Pain Patterns	213
Upright Postural Distortions	214
Kyphotic-Lordotic Posture.....	214
Rounded Back	214
Swayback.....	215
Scoliosis	215
Torticollis	215
Flat Back.....	216
Other Common Postural Distortions	217
Forward Head Posture	217
Rounded Shoulders.....	217
Raised Shoulder.....	217
Postural Elements in the Lower Limbs	218
Hyperpronation.....	218
Genu Valgum and Genu Varum.....	219
<i>In the Lab—Sitting, Bending Over, and Lying Down</i>	220
Review Questions	224

15 Gait 225

Gait	226
Step by Step	226
Stance and Swing Phases	227
Stance Phase.....	228
Swing Phase	229
Gait and the Hips	230
<i>In the Lab—Other Factors in Gait</i>	231
Various Measurements	231
Cadence	231
Trunk Rotation and Contralateral Limb Motion.....	231
Muscle Activity During Gait	232
<i>In the Lab—Furniture and Clothing</i>	234
Abnormal Gaits	238
Muscular Weakness/Paralysis.....	238
Limitation of Joint Range of Motion	240
Neurological Involvement.....	241
Taking a Look Around	242
Assessing Posture and Gait of Yourself and Others ...	242
A Day in the Life of Movement, Part 2	246
Putting It All Together Over the Course of a Day.....	246
Review Questions	250

Index and More 251

Joint Range of Motion Chart	253
Glossary	254
<i>In the Lab—2 Buckets, 2 QLs, and 1 Spine</i>	260
<i>In the Lab—Postural Development of the Spine</i>	260
<i>In the Lab—Toddler + Car Seat = Core</i>	260
<i>In the Lab—The Diaphragm’s Decision</i>	261
<i>In the Lab—The Headbang</i>	261
<i>To Sit or Stand—The Psoas’s Dilemma</i>	262
Bibliography	263
Index	264
